

How send us your U22 log files.

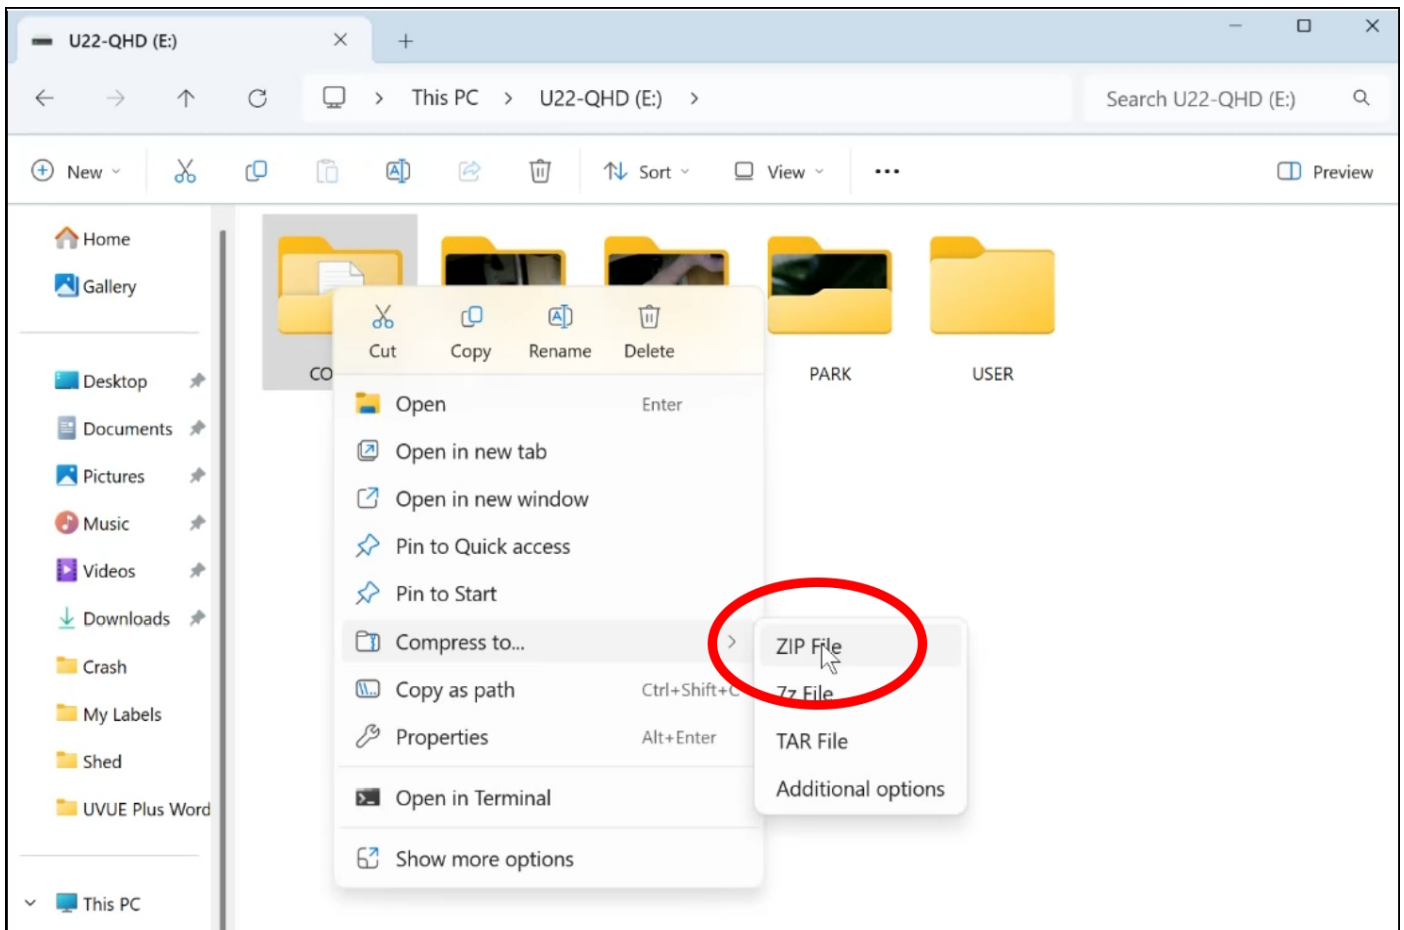

What are log files? Each time your camera turns on, goes to parking mode or turns of it creates a text record known as a log file. These entries contain valuable information on your dashcam.

These files can help us help you when certain situations arise such as short parking mode times or a flat vehicle battery.

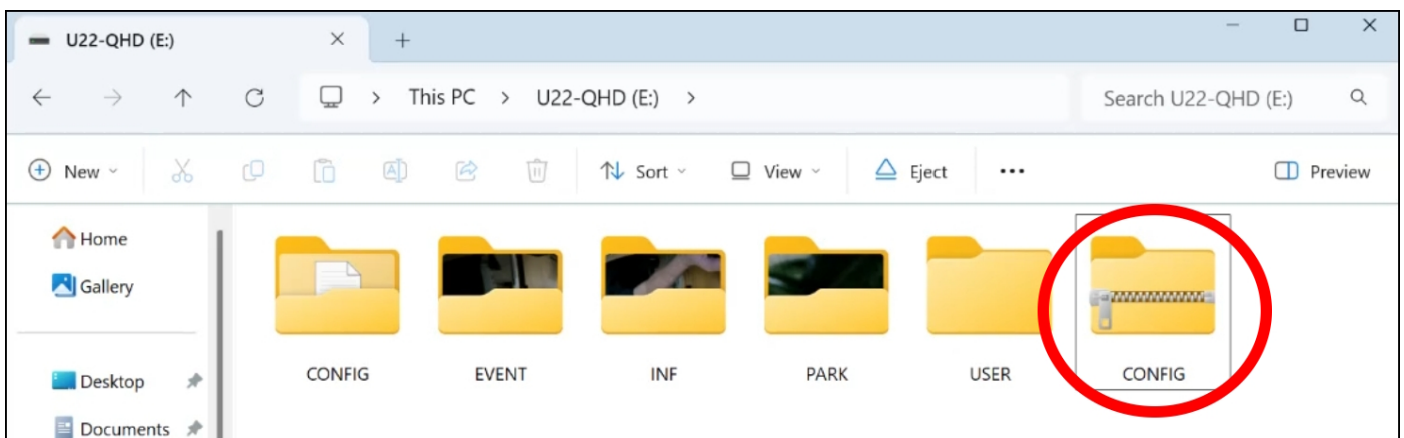

1. Put the memory card in your PC and open the card through file viewer.

2. Right click" the CONFIG folder, select "Compress to" "ZIP File.

3. After the log file is created you can hit “enter” to name it “CONFIG” or type in any name you choose. (eg: john smiths log file)

4. Email this file to rod@uvue.com.au
